### FOOT NOTE

**088** - Revolver cables can only be used with stock throttle body (or carburetor where applicable) and Revolver throttle. **106** - For use with stock throttle bodies. Revolver throttle kit for BMW S1000RR Vehicle production date range 09/08 - 03/12. Revolver Kits have cables specifically designed for fitment on specific models, but the Revolver throttle itself is not model specific. Therefore, in some situations, the Revolver kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Revolver throttle tube and grip, install longer aftermarket handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Revolver kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Warning: Improper installation could result in great bodily injury or death. **107** - Designed to fit BMW S1000RR production date range 09/08 - 08/12 Revolver cables can only be used with stock throttle bodies (or carburetor where applicable) and Revolver throttle.
